DETAILED ACTION

Specification

The abstract of the disclosure is objected to because of the following informalities: please insert space between each words in lines 2, 7, and 13. Correction is required. See MPEP § 608.01(b).

The disclosure is objected to because of the following informalities: please insert space between each words i.e. in page 1 line 23, page 2 line 6, 12, etc... Please correct the rest of specification for the same informalities.

Appropriate correction is required.

Claim Objections

Claims 1-11are objected to because of the following informalities: insert space between the words "division" and "multiplex" and "modem" in claims 1-11. Also, please insert space between words in claim 5 line 3, and claim 8 line 3. Appropriate correction is required.

Claim 1 is objected to because of the following informalities: correct the subject matter "a plurality of subcarrier" in cline 4 to –the plurality of subcarrier--. Appropriate correction is required.

Drawings

Figures 10-12 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.121(d)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, it is not clear what it meant by "wherein each of a plurality of sub carrier groups into which the plurality of subcarriers are divided is assigned to each of the plurality of communication channels" as cited in the claim.

Claims 2-11 are rejected for dependents of the rejected claim.
